SUMMARY

Electronics and Communication Engineering student graduating in 2027 with hands-on experience building AI-powered applications and an Industrial IoT prototype. Skilled in Python, LLM workflows, RAG, APIs, backend integration, computer vision, and hardware-software systems.

TECHNICAL SKILLS

Languages: Python, SQL, C (Basic), JavaScript (Basic)

AI/ML: LLMs, RAG, NLP, Machine Learning, Scikit-learn, OpenCV

Backend & Web: REST APIs, Flask, Streamlit, React.js, Node.js, Express.js

Databases & Tools: PostgreSQL, Supabase, Firebase, Git, GitHub, NumPy, Pandas, SciPy, Matplotlib, Google Colab

PROJECTS

InterviewVerse AI - AI-Powered Resume-to-VR Interview Platform

Python, NLP, LLM APIs, RAG, React.js, Node.js/Express.js, Supabase, PostgreSQL, Unity/XR Toolkit, WebXR

- Developed an end-to-end interview preparation platform that transforms candidate resume information into personalized interview experiences.
- Implemented resume parsing and skill-extraction workflows to analyze candidate profiles and support role matching and personalized career guidance.
- Integrated LLM pipelines for AI-generated questions, multi-round interview flows, evaluation features, and authenticated API/database workflows.

RaghBodha - Authenticated Web Application

Supabase, PostgreSQL, REST APIs, Vercel, Render

- Developed and deployed a responsive web application with authenticated user workflows using Supabase.
- Implemented RESTful API workflows connected to PostgreSQL for structured data storage, retrieval, and application functionality.

Generative AI & Computer Vision Experiments

Python, GANs, VAEs, OpenCV, NumPy, SciPy, Scikit-learn, Matplotlib

- Built and evaluated basic GAN and VAE experiments for generative image synthesis and latent-space analysis using Python.
- Implemented OpenCV image-processing workflows and FFT-based frequency-domain analysis for noise removal and visual comparison.

EXPERIENCE

Mindsetcraft Labs Pvt. Ltd. - Industrial IoT Intern

Mysore, Karnataka | Jan 2024 - Apr 2024

- Gained hands-on experience with Industrial IoT concepts, sensor interfacing, microcontrollers, and hardware-software integration.
- Developed an IoT-based Sign-to-Voice Conversion system using an ESP32 and four flex sensors embedded in a wearable glove to detect predefined hand gestures.
- Integrated a 16x2 LCD, GSM module, APR33A3 voice module, and speaker for gesture feedback and voice output; worked on real-time sensor acquisition, module interfacing, testing, and debugging.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

Maharaja Institute of Technology Mysore, Mysore, Karnataka, India | 2024 - 2027 (Expected)
